INSPECTION OF COMMERCIAL FERTILIZERS

R. Waltz, *State Chemist*
M. Pearson, *Fertilizer Administrator*

Purpose and Scope of the Fertilizer Law

The purpose of the Indiana Commercial Fertilizer Law is to provide adequate information through fair and honest labeling in order that an intelligent purchase may be made. The Indiana State Chemist is charged with the responsibility for administration of this law. Related functions of this administration include label examination and product inspection.

Registration during calendar 2012 was approved for 8,460 products marketed by 688 different companies. The inspection and laboratory staff examined labeling matter and composition of 2,715 various lots of fertilizer representing 2.8 million tons distributed throughout Indiana.

The laboratory reviewed 5,552 guarantees made for these products and detected deficiencies in 281. The guarantees checked included not only the primary nutrients of nitrogen, phosphorus and potassium, but also calcium, magnesium, sulfur, boron, copper, iron, manganese, molybdenum and zinc.

Under the Commercial Fertilizer Law the State Chemist may require refunds to be paid to the purchasers of deficient fertilizer amounting to the value of the deficiency. As a result of this provision \$56,782 was refunded either to the purchaser or to a charitable or educational organization when the purchaser was unknown.

Summaries of fertilizer distribution classified by tonnage, grade and county were prepared on a semi-annual basis and made available to interested parties. The Office of Indiana State Chemist continues to be a source of information concerning labeling, fertilizer standards, and laboratory procedures for industry concerns and organizations as well as other regulatory bodies.

Commodities to which the fertilizer law apply encompass any and all materials claimed to have value in the promotion of plant growth and those containing recognized plant food nutrients which are used either for the plant food content or for compounding mixed fertilizers. Exempted from the requirements of this law are unmanipulated animal and vegetable manures, marl, lime, wood ashes and land plaster. The exceptions noted do not imply that fertilizer claims may be made for these items outside the law.

Registration Requirements

Each grade of each brand of fertilizer must be registered with the State Chemist prior to distribution. Only those fertilizers exchanged between manufacturers are exempt from this requirement.

Registrations expire annually on June 30, and must be renewed on forms supplied by the Office of the State Chemist. Registration renewals received after July 31 are subject to a late fee.

Labels of new products and of those containing micronutrients and pesticide additives must accompany applications for registration. Also, cautionary labels to be attached to product containers and delivery statements for bulk shipments of fertilizer containing 0.03% or more of water soluble boron, 0.001% molybdenum, and pesticide additives must accompany registration applications. Sources of secondary nutrients and micronutrients claimed must be divulged upon the registration application. Such information is held confidential.

It is the responsibility of the person whose name and address appears upon the fertilizer label to obtain registration for that item.

Independent bulk fertilizer dealers must assume responsibility for the quality of bulk materials in their possession. Generally, these dealers handle material from more than one supplier, and any given

supplier has no control over his product following delivery. Therefore, independent bulk dealers must register these items under their name. Exceptions are made if the dealer has only one supplier and that supplier will assume responsibility for the quality of materials and has himself registered these products. In these exceptions the dealer involved must label and sell the product in the name of the supplier, not his own.

Labeling Requirements

For the purposes of registration and labeling it is necessary to have a clear understanding of the terms *grade*, *brand* and *guaranteed analysis*.

Grade means the minimum percentage of total nitrogen, available phosphate (P_2O_5) and soluble potash (K_2O) stated in this order. These items only are permitted to be expressed in the *grade*. Examples are 5-20-20, 0-46-0, 28-0-0 and 0-0-60.

Brand means a term, design or trademark used in connection with one or more grades of fertilizer.

Guaranteed Analysis is the statement of guaranteed contents showing the minimum percentage of plant food claimed in the following order and form:

Total Nitrogen (N)..... _____ percent
Available Phosphate (P_2O_5) _____ percent
Soluble Potash (K_2O) _____ percent

Additional claims for other nutrients may be made upon application and approval. These will be limited to the following. These additional nutrients, when claimed, must be listed in the *guaranteed analysis* statement immediately following the primary elements in the following order and form:

Calcium (Ca) _____ percent
Magnesium (Mg) _____ percent
Sulfur (S) _____ percent
Boron (B) _____ percent
Chlorine (Cl) _____ percent
Cobalt (Co) _____ percent
Copper (Cu) _____ percent
Iron (Fe) _____ percent
Manganese (Mn) _____ percent
Molybdenum (Mo) _____ percent
Sodium (Na) _____ percent
Zinc (Zn) _____ percent

Ground phosphate rock must be guaranteed as to both total and available phosphate and, also, the percentage passing through a U.S. Standard Sieve No. 100.

It is suggested that a label for bone meal follow this form:

John Doe's Bone Meal

2-10-0

Guaranteed Analysis

Total Nitrogen (N)..... 2.0%
Available Phosphate (P₂O₅)10.0%
(Total Phosphate (P₂O₅23.0%)

All fertilizer offered for sale, sold or otherwise supplied in Indiana is required to have an accompanying label statement. Packaged fertilizer must have this statement attached to or otherwise permanently affixed to the container. Fertilizer distributed in bulk must have the label statement appear upon the delivery ticket or invoice and this statement must accompany the shipment and be presented to the purchaser at the time of delivery.

The label statement must furnish the following information:

- (1) Brand
- (2) Grade
- (3) Guaranteed analysis
- (4) Net Weight
- (5) Name and address of the person registering the fertilizer

Water soluble boron contents of 0.03% or more require that a warning statement accompany delivery of the fertilizer. This statement shall carry the word WARNING in letters one inch in height. It shall state the crop for which the fertilizer is to be used and also state that the use of the fertilizer on any other than those recommended may result in serious injury to the crop.

Molybdenum contents of 0.001% or more require that a caution statement accompany delivery of the fertilizer. This statement shall be conspicuously and prominently located upon the label and shall carry the words CAUTION or WARNING. This statement must caution against the feeding of forage grown on soil fertilized with this product. Applications of fertilizers containing molybdenum at this level and above may result in forage crops containing toxic levels of molybdenum. Molybdenum poisoning to animals may result when they are fed this forage.

There is no exception made or permitted to the above requirements regardless of the mode of handling.

All bulk fertilizer in storage and ready for sale must be labeled conspicuously with the above information on the outside of the bin or tank by the fertilizer dealer. Liquid products are to be labeled as well as solid products.

Examples of proper bin or tank labeling is as follows:

John Doe's 0-46-0
Guaranteed Analysis
Available Phosphate (P₂O₅)46%
John Doe Fertilizer Company
Everywhere, IN 47372

John Doe's 13-13-13 Premium
Guaranteed Analysis
Total Nitrogen (N).....13%
Available Phosphate (P₂O₅)13%
Soluble Potash (K₂O)13%
Magnesium (Mg)1.0%
Sulfur (S)1.0%
Iron (Fe)0.2%
Zinc (Zn)0.1%

John Doe Fertilizer Company
Everywhere, IN 47372

These labeling requirements pertain to all bulk distribution of fertilizer whether registered, custom mixed, or distributed as fertilizer material. Two or more fertilizer materials contained in the same enclosure will be treated in the same manner for inspection purposes as any other mixture, and will be expected to be properly labeled as indicated above. Listing of weights of materials used for custom mixing is optional information and, while encouraged, is not required, and does not substitute for any of the above requirements.

Pesticides, such as insecticides and herbicides, may be incorporated in fertilizer. If they are incorporated the percentage by weight of the active ingredient(s) must be stated together with directions for use and caution or warning statements sufficient to protect the public.

Custom Blend Fertilizer

Custom blend fertilizer is defined as a blend of two or more fertilizer materials according to specifications provided to a blender in a soil test nutrient recommendation or to meet specific consumer requirements prior to blending. Mixtures of this type, by their very nature, are of small batch size, and result in a multitude of analyses. Their purpose is to satisfy the specific requirements for a soil and crop as determined by the farmer.

Custom mixed fertilizer is not required to be registered. However, all fertilizer materials used to prepare the mixture must have received prior registration and the analysis of this mixture must be guaranteed upon the delivery statement or label.

Inspection Requested by Purchaser

Consumers are entitled to verifications of the label guarantee of fertilizer purchases and to refund if the product is found deficient by the State Chemist. Requests for inspections of this kind should be forwarded to the Office of the State Chemist. Only samples drawn by an agent of the State Chemist will be accepted and analyzed.

Fertilizer Deficiency and Refund

When fertilizer is deficient in any element beyond recognized investigational allowances a refund is calculated based on the prices given in Table 2 of this circular. If the refund amounts to \$1.00 or more for the shipment or lot sampled, the registrant must pay this refund to the consumer, if known; if the consumer is not known, he is required to pass the refund on to a charitable or educational organization in the community in which the deficiency occurred and to file with the State Chemist a receipt or receipts showing that payment has been made.

Investigational Allowances

A sample is considered to have passed inspection if the amount of each plant food element found on analysis was equal to or above the amount guaranteed. In making this comparison, investigational allowances are applied to compensate for reasonable and unavoidable variations in sampling, in reducing the composite sample to the working sample, and in making the analyses.

Investigational allowances applied to results reported herein are those adopted by the Association of American Plant Food Control Officials, Inc.

A sample is classified as deficient when the analysis of any nutrient is below guarantee by an amount exceeding the values in the following schedule:

(1)

Fertilizer Investigational Allowances

| <i>N P or K Guarantee</i> | <i>N Allowance</i> | <i>P₂O₅ Allowance</i> | <i>K₂O Allowance</i> |
|-------------------------------|------------------------|---|-------------------------------------|
| 1 | .49 | 0.67 | 0.41 |
| 2 | .49 | 0.67 | 0.41 |
| 3 | .49 | 0.67 | 0.41 |
| 4 | .49 | 0.67 | 0.41 |
| 5 | .51 | 0.67 | 0.43 |
| 6 | .52 | 0.67 | 0.47 |
| 7 | .54 | 0.68 | 0.53 |
| 8 | .55 | 0.68 | 0.60 |
| 9 | .57 | 0.68 | 0.65 |
| 10 | .58 | 0.68 | 0.70 |
| 11 | .59 | 0.68 | 0.76 |
| 12 | .61 | 0.68 | 0.79 |
| 13 | .62 | 0.70 | 0.83 |
| 14 | .63 | 0.70 | 0.87 |
| 15 | .65 | 0.70 | 0.90 |
| 16 | .67 | 0.70 | 0.94 |
| 17 | .68 | 0.71 | 0.96 |
| 18 | .70 | 0.71 | 1.01 |
| 19 | .71 | 0.72 | 1.03 |
| 20 | .72 | 0.72 | 1.08 |
| 21 | .73 | 0.72 | 1.10 |
| 22 | .75 | 0.72 | 1.15 |
| 23 | .76 | 0.73 | 1.16 |
| 24 | .78 | 0.73 | 1.21 |
| 25 | .79 | 0.73 | 1.23 |
| 26 | .81 | 0.73 | 1.27 |
| 27 | .82 | 0.74 | 1.30 |
| 28 | .83 | 0.74 | 1.33 |
| 29 | .85 | 0.74 | 1.36 |
| 30 | .86 | 0.75 | 1.39 |
| 31 | .87 | 0.75 | 1.42 |
| 32 or more | .88 | 0.76 | 1.44 |

(2) the overall relative value of the product, as found by analysis, is less than 98 percent of the guaranteed commercial value, using the following values of plant food nutrients:

\$11.00 per unit (percentage) nitrogen
\$8.00 per unit (percentage) available phosphate
\$10.00 per unit (percentage) soluble potash

Example: Product guaranteed to be 12-12-12 and the analysis indicates 11.5-12.2-11.2

Guaranteed commercial value = (12 x \$11) + (12 x \$8) + (12 x \$10) = \$348.00

Overall relative value found = $(11.5 \times \$11) + (12.2 \times \$8) + (11.2 \times \$10) = \336.10 $(336.10 \div 348) \times 100 = 96.6\%$ of guaranteed commercial value, and/or

- (3) the secondary or micronutrient content is less than the guaranteed value by an amount exceeding 1.00, or as follows, whichever is the lesser:

for calcium, magnesium, or sulfur $0.2 + (0.05 \times \text{guarantee})$,

for boron $0.003 + (0.15 \times \text{guarantee})$,

for cobalt or molybdenum $0.0001 + (0.30 \times \text{guarantee})$,

for chlorine, copper, iron, manganese, sodium, or zinc $0.005 + (0.10 \times \text{guarantee})$, and/or

- (4) the pesticide content is less than the guaranteed value by an amount exceeding 15 percent of guarantee when guarantee is less than 1.0, or 0.1 plus 5 percent of guarantee when guarantee is 1.0 or greater.

Coefficient of Variation

As in the past, Table 3 includes the average analysis of all samples which met the guarantee within the investigational allowances and the individual samples which did not. These values, however, do not give an indication of the range in analyses on either side of the average. Consider, for example, the case in which a series of five samples analyzed 4.4, 4.8, 5.1, 4.5, and 5.8 percent nitrogen to give an average of 5.1 percent. A second series, perhaps from a different manufacturer, analyzed 5.1, 5.1, 5.1, 5.1 and 5.2 percent nitrogen for an average of 5.1 percent. Although the average was identical the range or "scatter" is much less in the second series. The "Coefficient of Variation" is a measure of this scatter. It is an expression of the standard deviation in terms of the average. The first series has a high coefficient of variation while the second series has a low coefficient of variation. Thus, a small coefficient of variation indicates the manufacturer has good production control. The coefficients of variation shown in Table 3 were calculated from all samples including those which passed as well as those that did not meet guarantee.

Table 1. Prices to be used in estimating comparative values of fertilizers for 2012

| Type | Per pound (cents) | Per unit of plant food (dollars) |
|--|----------------------|--|
| All fertilizer - | | |
| Nitrogen (N) | 30.0 | 12.00 |
| Available Phosphate (P ₂ O ₅) | 20.0 | 9.00 |
| Soluble Potash (K ₂ O) | 20.0 | 10.00 |
| Animal by-products, bone, tankage, etc. - | | |
| Total phosphate (P ₂ O ₅) | 15.0 | 3.00 |
| Calcium (Ca) | 5.0 | 1.00 |
| Magnesium (Mg) | 5.0 | 1.00 |
| Sulfur (S) | 5.0 | 3.00 |
| Boron (B) | 45.0 | 9.00 |
| Chlorine (Cl) | 5.0 | 1.00 |
| Cobalt (Co) | 500.0 | 100.00 |
| Copper (Cu) | 75.0 | 15.00 |
| Iron (Fe) | 25.0 | 5.00 |
| Manganese (Mn) | 25.0 | 5.00 |
| Molybdenum (Mo) | 300.0 | 60.00 |
| Sodium (Na) | 5.0 | 1.00 |
| Zinc (Zn) | 40.0 | 8.00 |
