OISC pesticide complaint intake, investigation & enforcement

> -IPRB Meeting-July 10, 2024

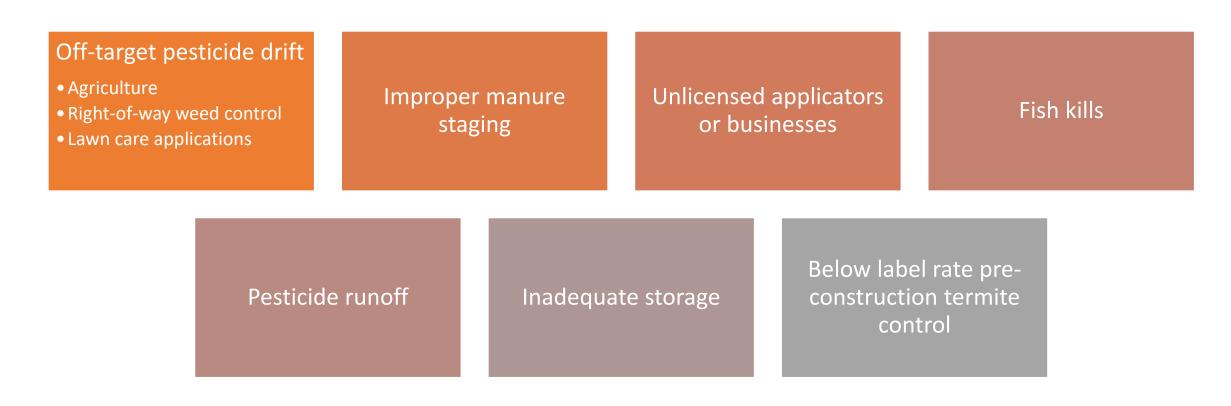

Complaint intake

- Not every complaint call becomes a case
 - About half of all reported incidents become assigned cases
- Why?
 - It may be something we don't regulate (odor)
 - The problem may not be caused by fertilizer or pesticides
 - Ammonia in pool
 - Disease or insects (refer to extension)
 - Anonymous complaint won't work (drift to people or their property)
 - Complainant not willing to testify (drift to people)

Complaint intake

- We explain their options (PPP-110 Options for Drift Incident)
 - Work it out with the applicator (no OISC involvement)
 - Documentary only (OISC involved)
 - Full investigation (OISC involved)
- Resolving a case can be a lengthy process (6 months to a year)
- We are fact (evidence) finders and law enforcers
- We may or may not determine what caused the problem/injury

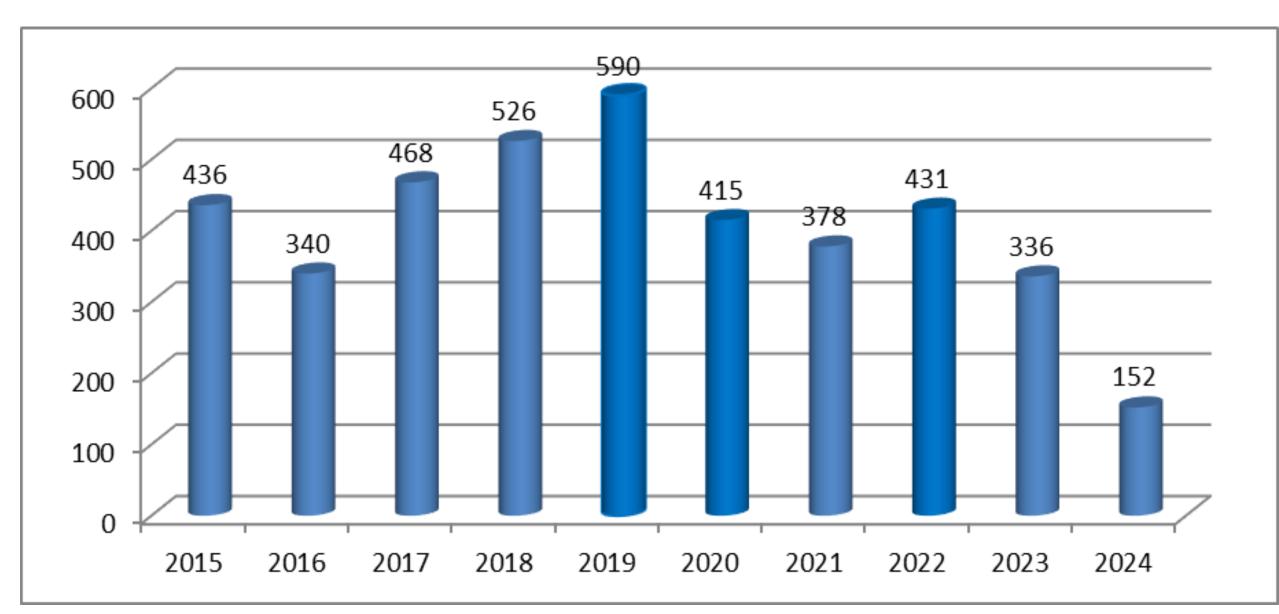

What are some of the highest volume tips & complaints investigated by OISC ?

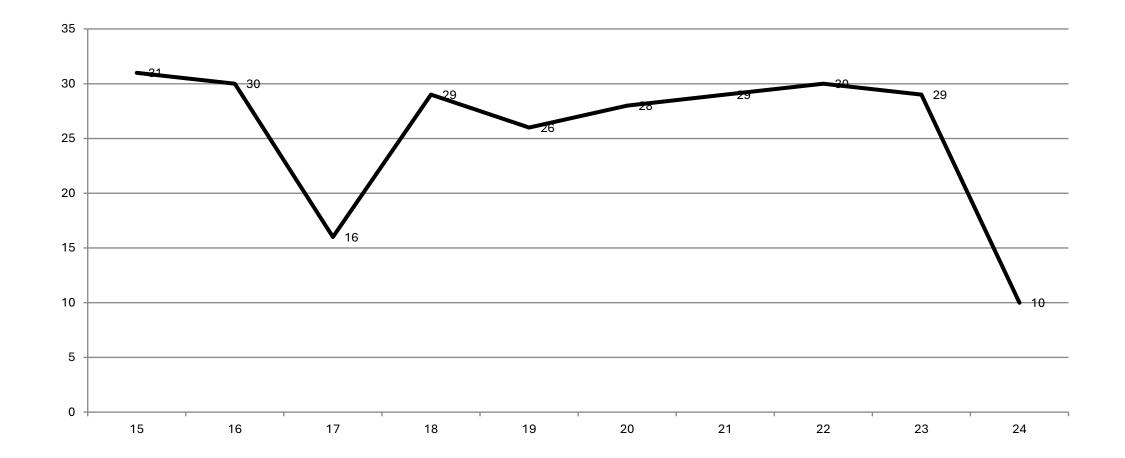

How are Tips & Complaints Filed with OISC ??

- Pesticide & Manure Incident Complaints? Contact Joe Becovitz Telephone: 765-494-1589 E-mail: <u>becovitz@purdue.edu</u>
- On-line written complaint form
- https://www.oisc.purdue.edu/
