Indiana Raw Milk and Raw Milk Product Sales

To sell raw milk products in Indiana, they must be labeled as pet treats or supplements. You will need to complete a Commercial Feed License Application form F-1 and Pet and/or Specialty Food Products List form F-3. These forms can be found on our website <https://www.oisc.purdue.edu/petfood/forms.html>.

It is \$50 annually for the feed license and it is \$50 annually per product 10 lbs. or less. If there are different ingredients, name, or guaranteed analysis then it is a different product. Different size packages/containers are not considered different products. However, if the product name includes something such as small, medium, or large for the size of animal, then each size is a different product therefore would need its own product fee.

Any package/container over 10 lbs. falls under our tonnage law. It is \$50 annually for the feed license and 40 cents a ton per quarter with a \$5 minimum per quarter. A tonnage report is mailed to you and must be completed and mailed to our office with a check each quarter by the due date regardless of if anything was sold or not. If the tonnage report is late there is a \$50 late fee.

Containers of 1 gallon or less fit into the category of 10 lbs or less and require the product fee of \$50 per product. Containers over a gallon fit into our tonnage law. If you sell in containers both in less than or equal to 1 gallon and containers over 1 gallon - the small package fee and tonnage are required.

The Indiana Commercial Feed Law and Animal Foods Rules & Regulation can be found at the link below:
http://www.oisc.purdue.edu/oisc_rules_regs_laws.html#feedlaws.

IC 15-19-7-40 Prohibited acts

(7) The distribution of raw milk for use as a commercial feed for any species if the raw milk is not prominently labeled "Not for Human Consumption".

Raw milk labels must include the following information:

Name of product – Raw (species) Milk – **must be on front of label**

Intended species (example: dog, cat, pets) – **must be on front of label**

NOT FOR HUMAN CONSUMPTION – **prominently on the front of the label**

Product intention “treat” “snack” “supplement”– **must be on front of label** or “This product is intended for intermittent or supplemental feeding only” elsewhere on label

Guaranteed analysis

Crude protein min %

Crude fat min %

Crude fiber max%

Moisture max%

Quantity Statement in US Standard and metric units - example X fl. oz (X ml) – **must at the bottom 1/3 of the front of the label**

Name and address of company – **company name in plain text next to city, state, and zip code**

Some helpful conversions:

1 gallon = 3.79 L

1 quart = 946 mL

1 pint = 473 mL

16 fl. oz. = 473 mL
32 fl. oz. = 946 mL
128 fl. oz. = 3.79 L

The best way to get the guaranteed analysis is by sending a sample to a lab. You can search for food analysis labs online to find options. It is always best to call around to get the best price. Our office does not provide this service, our lab only tests products for regulatory purposes.

Once you receive the lab analysis, you will need to use the “as received” analysis values and you will want to give the values some wiggle room on the guaranteed analysis. The minimum values must be set below the laboratory result. The maximum values must be set above the laboratory result. Please do not put 0% guarantees or 100% guarantees on the label.

All product labels must be reviewed by our office, so please have them reviewed before printing expenses occur. Please send in a copy of all labels with the license application, products list (for products in packages 10 lbs or less), and a check. We are unable to accept credit card payment at this time.

The labels may be emailed but it must be indicated on the paperwork that the labels have been emailed. When emailing labels, please include them as attachments with file name as the product name.

Please see other helpful information at <https://oisc.purdue.edu/petfood/resources.html>
